	OGP Client Representative Dive Superintendent/Supervisor - Air and Saturation Project Manager	

OTHER CERTIFICATION

AutoCAD: Beginner to Professional Training
 Technical Drawing for Design and Drafting

SKILLS/EXPERIENCE SUMMARY

I have over 20 years working experience on inshore and offshore air and saturation projects as Diver, Supervisor, Superintendent, Life support technician, Dive medic technician, Subsea Intervention Manager, Client Diving/Site Representative, expeditor, technical advisor and project manager.

I have qualifications and experience in dive system audits and assurance and am up to date with the latest IMCA requirements in D011, D018, D023, D024, D037, D040, D053.

I have a vast amount of experience using pneumatic and hydraulic hand tools, hydraulic bolt tensioning, lift bags, diamond wire and hydraulic cutters, smart flanges, HP and LP water jetting, metrology, wet welding, Brocco cutting and underwater NDT methods and equipment.

I have experience in riser installations, spool installations, riser clamps, PLEM installations, subsea valve replacements, SBM installations, maintenance and replacements, X-MAS tree interventions, flexible riser tie-inns, anode installations, leak intervention, hot tapping, free span mitigation, FPSO installations, maintenance and change outs, SSIV installations, subsea hose and floating hose installations and change outs, pipe laying of 6 inch to 42 inch pipelines, pipeline burial and trenching, subsea excavation and dredging, GVI, CVI, CP, UT, MPI, ACFM, TOFD.

I have experience in creating risk assessments, JSAs and HIRA documents, procedures, task plans, work instructions, toolbox talks, DPRs, project planning and execution, reporting, writing of manuals and training materials and creating of project proposal documentation, dive system audits and competence assessments using various Microsoft Office programs, including project scheduling using MS Project..

I am a qualified facilitator of learning and am registered as a commercial diving instructor. Between offshore contracts I manage and instruct commercial diving courses and IMCA trainee dive supervisor courses and have written manuals and course materials for both air and saturation diving supervisor courses, dive system auditor and client diving representative courses, introduction to dynamic positioning and diving leadership courses. I am also a certified Assessor and have experience in carrying out assessments for a variety of competence assessment schemes and job roles.

I completed studies in project management through the University of Adelaide and have completed my CAPM® preparation training and am certified PRINCE2® Foundation in project management. I have experience in carrying out the processes of a project life cycle, and the PDCA cycle. I have completed introductory and in-depth studies of ISO 9001:2015 quality assurance and have an established understanding of the principals required for effective quality management.

I have completed NEBOSH studies in incident investigation and risk management and assessments and strongly promote safe planning and execution of all projects and tasks.

EMPLOYMENT HISTORY

Company/Location	Client	Dates	Position	Vessel / Project Info
Progressive Dive Solutions	Various	15 August 2023 – 03 November 2023	Diving Technical Advisor	Hired as a 3 rd Party technical advisor for various diving contractors to create and review diving procedures and risk assessments for their upcoming and current projects.

	SHAWN ELLIOTT CV	Last Updated November 2023
	OGP Client Representative Dive Superintendent/Supervisor - Air and Saturation Project Manager	

EMPLOYMENT HISTORY				
Company/Location	Client	Dates	Position	Vessel / Project Info
				Review and provide comments for their diving operations manual, identifying shortfalls and latest changes to industry guidance documents to be included in their 2024 revisions.
Octomar Maritime Services Abidjan, Ivory Coast	Saipem; ENI	7 March 2023 – 7 August 2023	Dive Superintendent / OPM	Topaz Resolve Responsible for planning and execution of all diving operations. Writing of dive task plans, reporting, scheduling, logistics, liaising with client, assessment of dive team competencies, MOCs, risk assessments. FPSO Firenze installation – 8x mooring lines hook-up, 4x riser and 2x umbilicals hook-up.
Boskalis Offshore Dubai, UAE	Dubai Petroleum	31 October 2022 – 17 December 2022	Saturation Dive Superintendent	Constructor (DP2) Ensure Operations are carried out safely and in accordance with applicable regulations, codes and standards. Ensuring that required standards, work procedures and management of change are followed. Saturation and air diving IRM campaign. Installation of refurbished SPM
Boskalis Offshore Dubai, UAE	Dubai Petroleum	29 August 2022 – 21 October 2022	Saturation Diving Supervisor	Constructor (DP2) Remove leaking 6-inch Glycol injection valve assembly. UT inspection of damaged/buckled 18-inch pipeline and metrology. Riser clamp bolt replacement on 18-inch riser. 16-inch leak repair – DWC, Smart flanges and 3x spool pieces.
TechnipFMC Coral South, Mozambique	Coral FLNG SA	17 January 2022 – 21 May 2022	Diving Technical Advisor	Topaz Amani (DP2) Coral South FLNG installation and flexible riser installation.
